

**Energy** drives **social development**, and **responsible commercial** practices accelerate **economic growth** and strengthen societies.

# WHO WE ARE?

**We are a 100% Mexican company specialized in energy trading and distribution.**

Our commitment is to deliver safe, reliable, and sustainable services.

## We bring energy solutions to our customers

Our **highly skilled and dedicated team** is committed to delivering tailored energy solutions to individuals and organizations across the public and private sectors throughout the country.

## We operate locally with a global reach

We are an **integrated provider of energy products and services across Mexico**. As part of the international group **Noble Energy®**, we have a strong presence in the major markets of the Americas, Europe, and Asia.

## Our DNA is rooted in México

**Founded in 1986, Noble Energy Mexico** focuses on developing customized energy solutions aligned with our clients' specific requirements. Our long-term approach **enables greater operational efficiency and cost optimization**.

## OUR COMMITMENT

**To bring energy to every home and every corner of Mexico,** contributing to economic and social development while preserving the environment to ensure a better future for the next generations.

Whether you are an employee, customer, supplier, institution, or a Mexican citizen, **we want you to know that we are committed to you, and that you can feel our energy.**

Our customers are at the core of everything we do. We are committed to delivering excellence and continuously improving to remain their preferred partner.  
**We value your voice — your feedback matters!**

# OUR PRODUCT POTFOLIO

Noble Energy offers refined petroleum products and petrochemicals in:

**Northern Border:** Matamoros, Nuevo Laredo, Piedras Negras, Ciudad Juárez, and Nogales

**Northeast and Northwest:** Burgos, Cadereyta, Monterrey, Saltillo, and Hermosillo

**Central and Gulf Region:** San Luis Potosí, Mexico City Metropolitan Area, Tuxpan, Veracruz, and Pajaritos

**Bajío and Western Region:** Querétaro, Aguascalientes, Lagos de Moreno, Colima, and Manzanillo

Additionally, we operate nationwide, adapting to our client's demand and logistical requirements.

# OUR PRODUCTS

## 87-Octane Gasoline (Regular grade)

Combustibles para motores de combustión interna de encendido por chispa

## 92-Octane Gasoline (Premium Grade)

## Automotive Diesel

Designed for heavy-duty vehicles and public transport

## Diésel ULSD *Ultra-Low Sulphur Diesel*

For backup power generation in hospitals and data centers.

## Industrial Diesel

Suitable for tractors, power generation units, compressors, furnaces, and boiler systems.

## Light Napgha

Primarily pentane, hexane, and heptane, used as a feedstock for the petrochemical industry.

## Heavy Napgha

With C8+ and higher chains, used as an industrial solvent

## Petroleum Coke

Solid fuel used in cement plants and the metallurgical industry.

## Natural Gas

Its main component is methane (CH<sub>4</sub>), used for electricity generation and in cryogenic processes

## L.P.G.

Primarily propane and butane, used as a fuel for domestic purposes

# NUESTROS PRODUCTOS

## **Aromina 100**

Industrial solvent and diluent for petrochemical processes

## **Benzene**

Volatile and toxic hydrocarbon; precursor of styrene, phenol, and some resins

## **Isopropanol**

Cleaning agent; functions as an additive in the formulation of industrial inks

## **Gas-Naphta**

Light petroleum fraction, precursor of ethylene

## **Heptane**

Reference substance for octane rating in gasoline

## **Hexane**

Vegetable oil extractor

## **Toluene**

Solvent for paints and coatings

## **Xylene - Xylol**

Industrial solvent and precursor of certain types of PET

## **Butane**

## **Propane**

Components of LPG: Butane provides the calorific value, while propane allows for better vaporization

# SERVICES

## TRADE

We have **strategic partnerships** with carrier groups that comply with current regulations to deliver our petroleum and petrochemical products throughout Mexico.

## CLEANING

We perform the removal of contaminated products, cleaning, and degassing of storage tanks. In addition, we implement protective *barriers to prevent spills*.

- **Purification systems: industrial and domestic water**
- **Treatment equipment: filters, membranes, and reverse osmosis units**
- **Applications: energy, food, and commercial sectors**

## SELF-CONSUMPTION

We provide self-service fuel equipment as well as control systems installed for on-site consumption.

- **Projects: electricity generation for self-consumption**
- **Technologies: solar, wind, and cogeneration**
- **Services: design, implementation, and maintenance**

# TRADING

**Noble Energy** is present across the entire fuel value chain, including operations, trade, transportation, and distribution, through its own resources and the professional partnerships it establishes, providing solutions to meet its client´s demands

# SUPPLY

**Noble Energy has strategic partnerships for fuel supply with leading companies in Mexico.** As a fuel supplier, with **Pemex** as its main source, it also has strong relationships with other global leaders operating in the country. **This network of partnerships ensures operational, legal, and commercial certainty, allowing us to reliably serve our clients.**

Through our various storage terminals across Mexico.

# LOGISTICS

## Full-Liter Delivery

All our units are equipped with automated gate systems that open only at authorized points, ensuring the cargo is transported without alterations

## GPS-Tracked Units

We provide comprehensive monitoring 24 hours a day, 365 days a year.

## We ensure the traceability of our products

As distributors affiliated with Pemex, we fully adhere to current regulations.
